MEROBEL's EMP-SC series are mostly dedicated to the applications where slipping speed and slipping torque needs to be controlled in an independent way.

Built from the addition of slip ring and brushes to the EMP-TC brakes, this range of devices is offering two different power dissipation levels for each size (without or with cooling fins)

Torque [Nm]	Size	Rated Power [W]	
		EAT	ERAT
2	20	125	180
5	50	165	360
12	120	220	900
35	350	340	1300
65	650	500	1700
120	1200	1000	2000
200	2002	1200	2500
350	3500	1500	3000
500	5001	2000	3800
1000	10001	2800	5400
